Career Objective

Aspiring **Software Developer** with a strong foundation in **HTML and CSS**, and **basic knowledge of JavaScript**. I have hands-on experience in building and deploying **responsive web applications**. Passionate about writing **clean, efficient code** and continuously improving through practical projects and problem-solving.

Education

Bachelor of Agriculture (B.Agric) in Animal Science **2018 - 2024**
Obafemi Awolowo University (OAU), Ile Ife, Osun, Nigeria
Final Grade: First Class Honours

Technical Skills

Languages: HTML5, CSS3, JavaScript (ES6+)

Tools & Platforms: VS Code, Git, GitHub, Netlify, Ubuntu (WSL)

Core Competencies: Responsive Web Design, DOM Manipulation, Event Handling, Version Control

Projects

ThermoSync — Temperature Conversion Web App (Class Project)

- Designed and developed a responsive web application that converts temperatures between Celsius, Fahrenheit, and Kelvin.
- Implemented input validation, dynamic DOM updates, and event-driven logic using JavaScript.
- Deployed the live site on Netlify for public access (<https://thermosync.netlify.app/>)

Portfolio Website (Personal Project)

- Built a desktop-first website featuring a landing page, About, Contacts, and Projects
- Used semantic HTML, Vanilla CSS, and Flexbox/Grid layouts for a clean and responsive design.
- Managed source code and version history with Git and GitHub.
- <https://explorertunmise.netlify.app/>

Certifications

- Google UX Design Certificate - <https://coursera.org/verify/8GJAAK33KVY9>
- Frontend Development Bootcamp Certification from TechCrush (ID: TEC-E2C9A00A) <https://techcrush.pro/verify-certificates>
